**Vaccination Hub Website Now Live**

The newly developed Vaccination Hub website, [brazoshub.com](http://brazoshub.com), is now live and appointments can be scheduled for those individuals who meet the vaccine criteria.

The leadership team of the Brazos County Community Vaccination Hub has moved away from maintaining a waiting list for vaccinations. That registration function closed on Friday, March 5. In lieu of an individual registering on a wait list...and then waiting for an indeterminate period of time for a response... individuals now have direct access to the scheduling software.

Going forward all appointments will be directly scheduled through the newly established Vaccination Hub website, [brazoshub.com](http://brazoshub.com). The site is live with information about Hub operations, and available appointments are also live for this week's vaccine allotment. On subsequent weeks, the Hub website will post available appointments on Fridays at 10:00 am.

As has been the past practice, the numbers of appointments available each week will be dependent upon the allocation of vaccines to the Hub by the State of Texas.

Remember...our mission is **'getting a shot in everyone's arm who wants one'**.
