Moderna Second Dose Reminder

The leadership team of the Brazos County Community Vaccination Hub, in coordination with its community partners and leadership at St Joseph Health, has commenced providing only second doses of the Moderna vaccine. The Hub administered its last first dose on Tuesday, May 4.

Now...we are asking you our media partners, who are our key partners in this effort, to remind your audiences to be expecting a second dose appointment through an email from the Hub appointment system.

As always, any individual with a conflict affecting an appointment is encouraged to reach out to our call center, 979-703-1545, to request a change in appointment time. Additionally, any individual who received a first dose through the Hub and is approaching forty-two days after having received that dose, but has not yet received an email with a second dose appointment, should call that same number.

As a reminder...the Hub Team now believes that the balance of the need for first dose vaccinations can be addressed through the traditional sources in our community. As additional doses of vaccines continue to arrive in our community, there will be a multitude of locations at which a vaccination can be received. For specific locations, visit BrazosHub.com.

Our mission for the last five months has been... **'getting a shot in everyone's arm who wants one'**.
